

Bear Creek PAWS Academy

PAWS (Promoting Achievement Within Schools) Academy started in October 2012 at Bear Creek Elementary to provide extended learning and guidance to students in need of extra support. Daily activities include instruction from community partners that are experts in their fields of sports and recreation, science, fine arts, and more.

The PAWS Academy after-school program surrounds students with positive role models who focus on strength-based approaches that facilitate academic achievement, increased leadership abilities, and healthy social development.

Participating students receive value added time to their school day through the introduction of unique and fun educational activities, relationship development opportunities and academic support in a safe caring and supportive learning environment.
