

POLICY #5415
DISTRICT OWNED VEHICLES – USE & OPERATION

The Surrey Board of Education believes the school district personnel who are required to use district owned vehicles on a casual, part-time or regular basis must operate these vehicles in a safe, lawful, courteous, and proper manner.

The board also believes the school district personnel have a public duty and responsibility to ensure that the district owned vehicles comply with the applicable laws of the province and with board policies, regulations and departmental procedures.

The board expects its employees to comply with the laws of the province and board policy, failure to do so will result in appropriate disciplinary actions taken against the employee.

The board further expects employees to operate district owned vehicles on private property with the same level of care and attention as board property and public thorough fares.
