

Dear families,

The Surrey School district has provided us with a class set of Google Cardboard VR (Virtual Reality) headsets for use with students.

The headsets allow children to explore immersive environments around the world.

To use the headsets we require one smartphone per headset. The headsets work with a google cardboard app.

If you have an old Smartphone and charger at home, or are upgrading this holiday to a new phone, we would greatly appreciate a donation of your old phone!

With even 5-6 phones we can set up a station for students to use the VR headsets.

Thank you!

Mrs. Newman
